Aditya Singh

Full Stack Developer (MERN) | aadisi1907@gmail.com | +91-7011446967 | LinkedIn | Portfolio | GitHub | Delhi NCR, India

Summary

Full-stack developer (B.Tech CSE, 2026) who builds and ships end-to-end web applications with React, Redux, Node.js, Express and MongoDB. Delivered four deployed projects covering JWT authentication, REST APIs, cloud file storage, third-party API integration and an NLP-powered review classifier. Strong foundation in data structures, algorithms and OOP. Seeking a Full Stack / Software Developer role to build production-grade products.

Technical Skills

- **Frontend:** React.js, Redux / Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, GSAP, Responsive Design
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Axios
- **Databases and Storage:** MongoDB, MySQL, Supabase Storage
- **Languages:** JavaScript, Java, Python | **Tools:** Git, GitHub, Postman, VS Code, IntelliJ
- **Core CS:** Data Structures and Algorithms, OOP, REST architecture, Client-Server Architecture
- **Data / ML (bonus):** NumPy, Pandas, Scikit-learn, NLTK, Hugging Face Transformers

Projects

StoreIt – Full-Stack Cloud Storage Platform | React, Redux, Node.js, Express, MongoDB, Supabase | Live Demo | GitHub

- Built a full-stack cloud storage app with a responsive React + Redux frontend and a Node.js/Express REST API backed by MongoDB.
- Implemented secure JWT-based authentication and protected routes for per-user file access.
- Integrated Supabase Storage for file upload, download and deletion, with full CRUD and live dashboard updates.

RedThread – Blood Donor Finder Platform | React, Tailwind CSS, Node.js, Express, Supabase | Live Demo | GitHub

- Engineered a full-stack blood donor platform with separate donor and hospital dashboards, cutting donor discovery from hours of phone calls to seconds.
- Wrote a server-side Haversine matching engine that alerts only available, blood-type-compatible donors within 10 km of the hospital, with filtering on the backend so clients can’t spoof their location.
- Shipped to production on Vercel and Render with JWT middleware, Google OAuth and role-based routes, and integrated the Brevo API for near-instant donor and hospital email alerts.

ADB – Movie Discovery Platform | React, Redux Toolkit, Tailwind CSS, TMDB API | Live Demo | GitHub

- Built a responsive movie app with real-time search, trending lists and detail pages powered by the TMDB API.
- Managed global state with Redux Toolkit; implemented dynamic routing, loading states and error handling.

Premier – Model Showcase Website | HTML, CSS | Live Demo | GitHub

- Designed and built a Behance-inspired, fully responsive portfolio showcase with a clean visual hierarchy.

Experience

Data Science with Python – Summer School | Dronacharya College of Engineering, Haryana | Jun 2024 – Jul 2024

- Performed data cleaning, manipulation and visualisation using NumPy, Pandas and Matplotlib.
- Applied NLTK and Scikit-learn to build and improve machine learning models and extract insights from data.

Education

- **B.Tech, Computer Science Engineering** | Dronacharya College of Engineering, Haryana | 2022 – 2026 | CGPA: 8.2
- **Class XII (CBSE)** | Kendriya Vidyalaya No. 2, Delhi | 2022 | 86.2%
- **Class X (CBSE)** | Kendriya Vidyalaya No. 2, Delhi | 2020 | 87.2%

Certifications

- IBM Python for Data Science, AI and Development – Coursera
- Data Structures – Coursera
- Selenium WebDriver with Java – Udemy
- Advanced C++ Training – IIT Bombay
- Data Science with Python Summer School – Dronacharya College
